

# residential introduction

GMK Architecture inc. has been providing extraordinary residential design services since 1984.

We believe home design is the ultimate form of self-expression, and as such, should be designed by the Architect specifically for the site to reflect the client's individual tastes and lifestyle.

This philosophy allows us the opportunity to explore any architectural style from traditional to contemporary expressions in home design.

GMK believes that life is too short not to love your home. Whether collaborating on a new or remodeled home, together we can create the living environment you deserve to enjoy with your family and friends.
